

Your Voice Can Make a Difference

Become a Patient/Family Advisor at BIDMC in Boston

Patient and Family Advisors help BIDMC improve care in a variety of ways. Your involvement helps ensure that the needs and preferences of patients and families are the most important considerations when changes are being made.

How to Get Involved

Volunteer to be a Patient/Family Advisor if...

- You have received care or had a family member receive care at BIDMC within the past 2 years.
- You want to make meaningful, positive improvements to the health care experience for all patients and their families.

Our Commitment to Diversity

Extraordinary care requires input from an advisory group as diverse as the BIDMC community.
