  482 Bedford Street, Lexington Ambulatory Surgery, 1st Floor
- **Beth Israel Deaconess, Needham Campus**
  148 Chestnut Street, 3rd Floor

Day/ Date: _______________________
Arrival Time: _______________________
Procedure Time: _______________________
Approximate discharge time: ___________
Doctor who will do your test: _______________________

Advance preparation for your procedure:

- **Medications** – If you take Pepto-Bismol or any iron supplement, please stop taking 7 days prior to your procedure. You can continue to take aspirin or similar pain medicines. If you take **blood-thinning medicine**, please call us if you did not discuss it when you booked the appointment. **Do NOT make any changes** to these medicines on your own.

- **Diabetes** – Please contact the doctor who manages your diabetes before making any changes to your diet, medications or insulin pump.

- **If you may be pregnant** – Please consult your OB/GYN doctor prior to your appointment to discuss optimal timing for your procedure, and the best sedation/anesthesia approach.

- **Sedation** – Most patients receive sedatives for procedures. Please let us know in advance about any of the following items, which could have an impact on any sedation you may receive:
  - Allergic reaction or other problems related to sedatives or pain medicine/narcotics
  - If your weight is over 300 pounds
  - You are currently taking narcotic pain medicine
  - You have severe liver disease

As you recover from the sedatives, do not go back to work or school, make important decisions or provide care for children. You may resume all activities the next day unless otherwise instructed.

- **ARRANGE A RIDE HOME** – A responsible adult must come up to the procedure area when you are ready for discharge. No exceptions are made unless you plan to undergo the procedure without sedation. If you wish to do this, you should discuss it with your doctor in advance. **You may not drive yourself home after sedation.**

For more information, check out the **Preparing for your Procedure** page on our website by scanning this code with the camera on your phone or visiting [www.bidmc.org/gipreps](http://www.bidmc.org/gipreps)
Colonoscopy bowel prep: Double Mag Citrate

Preparation Check List

Seven (7) days before your colonoscopy
- Begin a low-residue diet. See the enclosed fact sheet for a guide to which foods you should avoid.

Two (2) days before your colonoscopy
- Begin a clear liquid diet as soon as you wake up. Be sure to drink plenty of clear liquids throughout the next two days. See the fact sheet for a list of clear liquids.
- 3 pm - Mag Citrate day #1, dose #1: Drink 1 ½ bottles of Magnesium citrate (15oz.).
- Within the next 2 hours: Drink at least three, 8-ounce glasses of clear liquids.
- 9 pm - Mag Citrate day #1, dose #2: Drink 1 ½ bottles of Magnesium citrate (15oz.). You must finish this dose before going to bed.

The day before your colonoscopy
- Remain on a clear liquid diet. Be sure to drink plenty of clear liquids throughout the day. See the fact sheet for a list of clear liquids.
- 7 pm - Mag Citrate day #2, dose #1: Drink another 1 ½ bottles of Magnesium citrate (15oz.).
- Within the next 2 hours: Drink at least three, 8-ounce glasses of clear liquids.

The day of your colonoscopy
- 6 hours before your scheduled procedure time- Mag Citrate day #2, dose #2: Drink the last 1 ½ bottles of Magnesium citrate (15oz.).

We realize you may need to wake up in the middle of the night to take the final dose. However, we have found this method results in the cleanest colon. Even though your stools may become clear before you are finished, it is important to finish all doses of your prep.

4 hours before your scheduled procedure time: Stop drinking all fluids. You may take any usual morning medications with a small sip of water. If you have diabetes or take blood thinners, please follow your doctor’s advice regarding any changes to your medications that may be needed.

IMPORTANT!
Please read all instructions at least one week prior to your procedure and call our office if you have any questions.

What you will need
- Six (6) bottles* (10 oz. each) of Magnesium Citrate, lemon or original flavor (no cherry or grape unless they are dye-free)

Optional:
- Three (3) bottles (16 oz. each) of clear liquids or sports drink (except red or pink)
- Packets of Jell-O, any color except red or pink
- Vegetable, chicken, or beef bouillon broth cubes
- Baby wipes

Prep Tips
- If you feel nauseated while doing the prep, peppermint tea or sucking on a lemon may help.
- It also may help to put the prep solution on ice.
- When you begin to have diarrhea, baby wipes may be used to prevent irritation. Avoid using Vaseline jelly or Desitin.

Magnesium Citrate is high in sodium. If you have kidney (renal) issues or congestive heart failure, please check with your doctor before using this prep.
Low-residue and clear liquid diets

Below is a guideline of foods you can eat while following a low-residue diet before your procedure, as well as a list of clear liquids for that stage of the prep. In general, avoid anything tough or fibrous, and anything with whole grains, nuts, seeds, skins or red dye.

### IMPORTANT!

A low residue diet will help you get the best results from your bowel prep. If you aren’t sure if a food is low-residue, it is best to skip it while you are preparing for your procedure.

<table>
<thead>
<tr>
<th>Food group</th>
<th>Foods allowed</th>
<th>Foods to avoid</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Milk &amp; Dairy</strong></td>
<td>Milk, soy or nut milks (as long as they aren't gritty) ice cream, yogurt, cheese</td>
<td>No dairy product with pieces of nuts, seeds or fruit in it</td>
</tr>
<tr>
