Master Key System			
Kaba Peaks			
Renovations or New Construction: The keying system will be worked out between the project manager and the Maintenance department’s general section supervisor and installed either by BIDMC locksmiths, or vendor contractors for new construction. The General contractor will install a “temporary Best 7 pin construction cores” system during the construction period; this system removed at the end of the project, preparing for the internal installation of the “permanent BIDMC Peaks key system mentioned above”.
