

## Bioanalytics Workshop, April 6 & 7

Beth Israel Deaconess Medical Center  
X-ray Crystallography Core

Research North, 99 Brookline Ave.  
Boston, MA

### Learn about measuring binding affinity, protein stability and aggregation from the experts

- Hear scientific talks by local researchers
- Discuss how the latest technologies, Microscale Thermophoresis and nanoDSF, help to advance your research
- Generate data from your own samples
- Network with your peers from Academia and Industry

### Who should attend?

Scientists working in:

- Protein purification
- X-ray or protein crystallography
- Cryo EM
- Drug development
- Formulation development
- Process development

Or struggling with:

- Small molecules
- Therapeutic proteins
- Sensitive membrane proteins

### I want to bring my own samples. What do I need to do?

Go to <https://bioanalytics.eventbrite.com> for more information.

**Seating is limited! Reserve your spot now!**
