

**Beth Israel Deaconess
Medical Center**

A teaching hospital of
Harvard Medical School

THE DIVISION OF OPHTHALMOLOGY/SHAPIRO 5
LONGWOOD MEDICAL EYE CENTER
DEPARTMENT OF OPHTHALMOLOGY/HARVARD MEDICAL SCHOOL

**POSITION: ONE OR TWO YEAR INTERNATIONAL RETINA
RESEARCH FELLOWSHIP POSITION**

The Division of Ophthalmology at the Beth Israel Deaconess Medical Center (BIDMC) is located in the heart of the Harvard Medical School Longwood Medical Area. The Longwood Medical Eye Center is the ideal place to conduct clinical and translational research as well as help provide the highest level of eye care to our diverse patients.

The overall goal of the International Retina Research Fellowship position is not only to develop the research and teaching techniques necessary to maximize their future academic career potential, but also expose the fellow to the latest medical and surgical retina diagnostics and treatments.

This is accomplished with a one- to two-year retina research fellowship position that combines clinical, basic science and translational research projects that aim to answer important clinical questions. The research fellow will be able to observe endoscopic vitreo-retinal surgery in the OR ([Endoscopic Views Videos](#)) and participate in the evaluation of patients in the clinic.

The international Retina Research fellow is encouraged to participate in Massachusetts Eye & Ear Infirmary (MEEI) and BIDMC ophthalmology and medical conferences.

We are seeking outstanding individuals who:

- 1) Completed an ophthalmology residency
- 2) Have 2 letters of recommendation
- 3) Have adequate funding for 1-2 year commitment

Inquiries for this position should include a cover letter and C.V. to:

Jorge G. Arroyo, MD, MPH
Director, Retina Service
