

Sadhguru Center Student Learning Opportunities

Participate in groundbreaking research, develop skills, and contribute to publications alongside field experts.

The Sadhguru Center for a Conscious Planet is a Harvard-affiliated multidisciplinary research center at Beth Israel Deaconess Medical Center within the Department of Anesthesia. The Center focuses on exploring the relationship between human consciousness, cognition and compassion through a scientific and spiritual lens across research, education, and outreach.

Learning Opportunity

Participants in the program have the opportunity to engage with the Center in diverse areas such as:

- Research* (Mind-body Intervention & Perioperative Anesthesia)
- App development
- Science communications
- Outreach initiatives

Program duration is flexible, from a few months to year-long commitments of remote or in-person availability. *Research program is in-person only.

Qualifications

- Must be at least 16 years of age.
- Current students: High school, College students, Graduate (Master's). Recent Master's degree graduates (within one year of graduation).

If interested, email sadhgurucenter@bidmc.harvard.edu with "Student Learning" in Subject line.

Testimonial

"I highly recommend this internship for students who want to see what working in academia is like, and for those curious about the evolving field of holistic and integrative medicine."

- Intern, 2023
